

IMPACT Manufacturing Summit

October 14-16th | Renaissance Schaumburg | Chicago

About the Event

IMPACT brings its attendees a truly comprehensive educational program that is 100% peer-driven and developed by **37** steering committee members from distinguished companies. The program addresses the major pressures and challenges seen in today's manufacturing world, from maintaining a successful continuous improvement system, to the complex managing and developing of innovation, technology and workforce. IMPACT is a must-attend event for all manufacturing executives.

Steering Committee

ADAC Automotive
Capitol Aggregates, Ltd.
Cisco Systems Inc
Classic Optical Laboratories Inc
Columbia Forest Products Inc.
Eddie Bauer
Elbit Systems of America
Ferrara Candy Company
Genesis Systems Group LLC
Gibbs & Cox, Inc.
Gogo
HARTING Ltd
Lincoln Electric Company

Amazon.com, Inc.
Memjet
Merck & Co.
PepsiCo
Pirelli Ltd
Precision Aerospace Corporation
Prime Conduit Inc
Rebecca Minkoff
Reynolds Polymer Technology
Safeway
SERAPID Inc
Sloan Valve Company

Boone Center Inc
Spectrum Brands
Spectrum Brands
Spinal Elements, Inc.
Stephen Gould Corporation
Stimson Lumber
The Louver Shop Inc
Valiant Machine & Tool Inc.
Verlo Mattress Factory Stores
Visionaire Lighting
XG Sciences Inc

Target Audience

C-Level, Senior Vice President, Vice President, Director, Head, Lead & Manager of:

Automation	Lean/Six Sigma	Packaging
Continuous Improvement	Logistics & Transportation	Plant
Distribution	Maintenance	Procurement & Sourcing
Engineering	Manufacturing	Production
Facilities	Operations	Quality Control
Innovation	Owners & Presidents	Supply Chain
IT	Sustainability/Green	

Keeping Up with the Age of Disruptive Manufacturing

Key Themes & Topics

Manufacturing Leadership Strategies

This track was specifically developed to support manufacturing leaders with best strategies and management tactics relating to planning and development, performance improvement and technology application. Effective leadership strategies are usually considered the foundation of any successful operation. Top leaders also see innovation and technology implementation as some of the most important ways for companies to accelerate the pace of change in today's global business environment. This track brings together a comprehensive view of varied methods that tackle some of the most pressing challenges in leadership.

- Leadership Planning and Development in the Digital Age
- Building a Successful and Sustainable Business Planning Process
- Leading Change and Manufacturing Innovation in Global Market
- Inspiring and Motivating Teams for Collaboration and Success
- Stimulating and Managing Innovation while Managing Cost Reductions
- Global Economic and Political Landscape Impacting the Manufacturing World

Effective Continuous Improvement

Continuous improvement is a great way for companies to identify opportunities and integrate improvements into their day-to-day operations. Working to constantly improve is the number one way in which businesses reduce operating overhead and streamline workflows. A successful CI plan allows companies to reduce wasted time and effort, resulting in time and money savings. This track will highlight some effective and tested continuous improvement strategies through carefully crafted presentations and case studies for the manufacturing leader of today.

- Panel: The Future of Lean Manufacturing and Continuous Improvement Programs
- Integration of CI throughout Manufacturing, Supply Chain, Procurement
- How to Sustain Meaningful Improvements Without Additional Resources
- Workplace Motivation for Continuous Improvement

Implementing Digital Manufacturing

The digital revolution is making a big impact in the world of manufacturing, providing more data than ever before. Artificial intelligence, automation and robotics, and additive technology are changing the game for many manufacturers and will transform every aspect of manufacturing in the next few years. However, the successful application and implementation of these technologies to optimize factory operations, boost product quality or improve cost-effectiveness is the challenge that many manufacturers are confronting. During this track, manufacturing leaders will discuss best strategies, practices and successful case studies of their digitalization transformation.

- Panel: Overcoming Roadblocks to Achieving Effective Digital Manufacturing
- The Impact of Internet of Things on the Manufacturing Floors
- Automation and Robotics: The Impact on the Factory Floor and Future Workforce
- Current and Future Opportunities of Additive Manufacturing

Workforce & Talent Management

In the business world, it has now been established that to drive optimal levels of operational success, business leaders need to engage high-performing employees, foster new talent and keep developing their workforce. Throughout this track workforce management experts will discuss top approaches to keeping an engaged workforce, managing the changing landscape and tackling the task of attracting qualified talent.

- How to Attract Millennials into Perceived Lower Tech Manufacturing Careers
- Workforce Training and Development: Creating Leaders at all Levels
- Improving Current Employee Engagement and Productivity Levels
- Strategies for Retention of Skilled Employees in a Changing Workforce Landscape
